

SELECTTECH

ROLL-ON/ROLL-OFF VIP SUITES

Designed for Productivity,
Connectivity, & Comfort

SelectTech specializes in production of enclosures and pallets that meet military airworthiness utilizing FAA-approved equipment for use in roll-on/roll-off applications, and offers a variety of customizable solutions.

ROLL ON CONFERENCE CAPSULE (ROCC)

SelectTech's RORO VIP Suites greatly increase transport and communications capabilities for senior leaders. The ROCC consists of both the **Conference Room/Staff Area (CR/SA)** and the **Senior Leader Suite (SLS)**. The two modules can be used independently or together and are certified for occupancy during all phases of flight on the C-17 with future modification enabling use on the C-130.

Units have options to include intercom systems, ethernet network, Wi-Fi, VTC system display, external voice and data connectivity (wideband or narrowband), 120V/60Hz outlets. The CR/SA also has workstations for 6 persons, and the SLS has a lavatory, work station and sleeping quarters for two.

Made in the USA

All design and Manufacturing are performed in the United States at our Ohio-based Facility

Mission Focus

Standardized systems provide a customizable platform to fit your needs with a wide variety of options

Office in the Sky

Integration of command, control, & connectivity transforms any aircraft into a mobile office

RELIABILITY IS NOT NEGOTIABLE

RORO SYSTEM SUPPORT EQUIPMENT

STEEL EAGLE

The Steel Eagle is a configurable communications module that provides advanced communications and network capabilities to the ROCC or other RORO Systems. It provides power management, wideband (X/Ku/Ka-band) and narrow band (Inmarsat) communications, VTC, enhanced monitoring, and other capabilities as required.

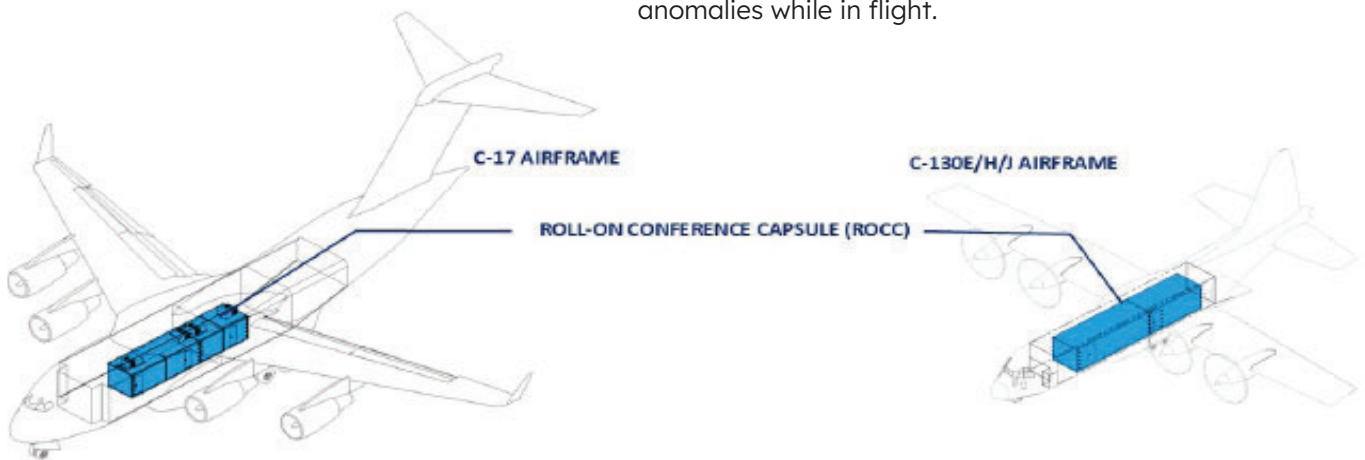

VIPER: PORTABLE COMMS TERMINAL

Dual-transit case, fully-airworthy portable communications platform certified for use on C-130 and C-17 aircraft. Uses wideband and Inmarsat SwiftBroadband providing users with voice and data communications. Interfaces with the EACN for NIPRNet and SIPRNet access. Top Secret capable via carry-on mini-kits for authorized users. Non-secure communications available. Designed to fly with our RORO platforms or standalone.

Specialized SelectTech-designed software tracks all aspects of the communication platforms. The software interface provides real-time information to the system operators allowing them to track and plan for anomalies while in flight.
